

KENO GAME DESIGN No. 5

Effective from 23 October 2025

The Keno game design No. 5 applies to Lotto New Zealand's Keno game conducted under the Keno Rules 2025 (Rule 21 Game Design refers).

Rule Reference

21 (2) (a) Game Matrix

- i) The range of numbers is 1 to 80 inclusive.
- ii) A player may select 1 to 10 numbers from the range.
- iii) 20 numbers from the range will be drawn on a random basis to determine the winning number selections.

21 (2) (b) Play types

There are two types of keno that may be made available:

- i) Standard keno: as described under the game matrix heading above. If a player does not make a selection of any other play type, the play type is the standard play type.
- ii) Multiplier keno: A player makes a selection of numbers as for standard keno and also elects to apply the multiplier. The multiplier is drawn from five options (1.5, 2, 3, 5 and 10).

21 (2) (d) Systems Selections

Not applicable. Systems selections are not available.

21 (2) (e) Restrictions

No restrictions have been imposed.

21 (2) (f) Ticket Cancellation

- i) A ticket may be cancelled only if it is returned to the issuing retailer.
- ii) A ticket in a game for which sales close at 10.00am on the day it is purchased must be cancelled by 10.01am on the same day, prior to the draw occurring.
- iii) A ticket in a game for which sales close at 1.00pm on the day it is purchased must be cancelled by 1.01pm on the same day, prior to the draw occurring.
- iv) A ticket in a game for which sales close at 3.00 pm on the day it is purchased must be cancelled by 3.01pm on the same day, prior to the draw occurring.
- v) A ticket in a game for which sales close at 6.00pm on the day it is purchased must be cancelled by 6.01pm on the same day, prior to the draw occurring.
- vi) A ticket in a game drawn on any day after the day it was purchased must be cancelled before close of ticket sales on the day it is purchased.

21 (2) (g) Cost Options

The cost options available to enter are \$1, \$2, \$3, \$4, \$5, \$10, \$20 \$50 and \$100 per selection for standard keno.

The cost of a selection doubles if the player elects to apply a multiplier to the selection.

21 (2) (h) Minimum Cost of Entry

The minimum cost of entry is \$1.

21 (2) (i) Minimum Number of Selections

The minimum number of selections is 1.

21 (2) (j) Prize Groups

35	10	1 in 8,911,711.2	1 to 8,911,710.2			10	\$250,000

Note 1: The chances of winning a prize are expressed as a fraction which is the proportion of distinct winning events in the complete set of distinct winning and non winning events. The fraction is presented as 1 chance in N, i.e. the numerator is always 1.

Note 2: The odds of winning a prize are expressed as the ratio of distinct winning events to non-winning events. This ratio is presented as 1 to N.

Note 3*: Prize tier 29 pays a prize for matching no numbers from the twenty drawn numbers. See Keno Rules 3 and 18(1).
